

## Projects at Innovation Hub

New ideas that are likely to benefit the society shall be encouraged. The students, after becoming members, will submit their project proposal or ideas. They can start working on the project after it is duly approved by the expert committee. Students will be required to document their daily works at the completion of each project session. Good works/projects will be posted on the website of the Centre and they may get opportunity to participate in the Science/Innovation Fairs organized by the Council or any such bodies.

## Membership

- Institutional
- Individual

There is no Membership fee till 31st March 2025.

## Membership Benefits

- Access to the premises of the Innovation Space for one year.
- Invitation to special educational programmes and Popular Science Lectures at RSC & SP, Jaipur.

## Groups visit for School's

School can send their student groups (max.30) accompanied by teacher for Innovation hub on prior booking basis. Booking will be done on first cum first serve basis. For further details, they are advised to contact Innovation Hub RSC & SP - Jaipur.

## Working hours

### For Individual members

(Except Sunday & National Holidays)

Morning Session : 09.30AM to 12.30PM

Afternoon Session : 02.00PM to 05.00PM

### For School's group visit (On prior bookings)

(Except Sunday & National Holidays)

Morning Session : 09.30AM to 12.30PM

Afternoon Session : 02.00PM to 05.00PM

Inspiring Innovations by the Young

# INNOVATION HUB

*"You have to dream before your dreams can come true...  
A dream is not that which you see while sleeping, it is  
something that does not let you sleep...."*

*You should not give up and we should not allow the  
problem to defeat us."*

**-Bharat Ratna (Dr.) APJ Abdul Kalam**

In today's world, conventional resources are rapidly depleting as the demand for more continues to grow. To sustain global growth and development, people are seeking innovative solutions. In this competitive environment, those with groundbreaking ideas lead the way, making innovation a driving force for inclusive prosperity and sustainable development.

Innovations have long emerged both inside and outside laboratories, a process that continues to evolve. However, despite numerous research facilities, aspiring innovators need platforms to bring their ideas to life. The President of India declared 2010–2020 the "Decade of Innovation" to encourage this spirit of creativity, and the National Council of Science Museums (NCSM) has taken up the initiative to foster innovation at the grassroots level.

The Innovation Hub at the Regional Science Centre in Jaipur is a pivotal part of this effort, designed to meet the needs of innovators across northern India. Equipped with state-of-the-art labs, hands-on workshops, and mentorship opportunities.

The Innovation Hub offers programs ranging from skill-building workshops to innovation competitions and collaborative projects, helping participants refine their ideas and gain practical experience.

By supporting the next generation of Indian scientists, engineers, and innovators, the Innovation Hub will play a crucial role in driving technological advancements, enhancing the local community, and contributing to a sustainable future.

### **Innovation Hub at RSC & SP, Jaipur:**

The Innovation Hub at the Regional Science Centre in Jaipur is designed to provide a dynamic platform for young minds to engage in creative and innovative activities. The main objective is to foster scientific thinking, critical analysis, and problem-solving skills through hands-on learning experiences. The hub is equipped with a well-furnished laboratory containing a range of tools and scientific instruments, enabling members to explore and experiment.

This facility is open to registered members, including students, teachers, and institutions. To encourage participation, there will be no membership fee until 31st March 2025, making it more accessible to a wider audience.

### **Main objectives**

- To engage our youth in creative hobbies & activities in science & technology
- To promote their critical thinking and practical problem solving skills
- To support their Idea to come to fruition
- To recognize, encourage and facilitate local innovations in S&T.

### **Facilities at Innovation Hub**

#### **A. Hall of Fame:**

Stories of major inventions and their inventors in different field will be told through multimedia kiosks

#### **B. Innovation/Digital Resource Centre:**

Broadband Internet terminals will provide access to innovation centric resources, journals, Books and grass root innovation portals etc.

#### **C. Innovation Laboratory:**

Facility for carrying out innovative activities, experiments & projects in a multi-disciplinary set up.

#### **D. Tech Lab:**

Stories of major inventions and their inventors in different field will be told through multimedia kiosks

### **Activities at the Innovation Hub**

#### **A. Break and Remake**

Student learn to do things with their own hand and also learn the engineering of the products.

#### **B. Build from Scrap**

Students make things from waste, scraps or low cost materials.

#### **C. Idea Box**

Students can generate their own innovative ideas and contribute to create an idea bank. Best idea are chosen for experimentation, model making and project works.

#### **D. Make your own Science Models/Kits**

Students can convert their Idea to make their own innovative science models or Kits.

#### **E. Real life problem identification & finding their solutions**

Students will identify or may be given a real life problem of practical importance to work for a possible technical solution.

#### **F. Investigative Projects**

Students will be given or generate their own mini research projects and work under the guidance of experts/mentors.
